

ACTIVITY SHEET

CSS BORDER PROPERTIES

Grade 11 – TechPro | Visual Studio Code

Name: Ramo, Jeric Y.	Grade & Section: 11 - Bell
Date: Sep / 23 / 2026	Score: / 50

I. LEARNING OBJECTIVES

- ☐ Explain the purpose of CSS borders.
- ☐ Apply border-style, border-width, and border-color.
- ☐ Style individual border sides.
- ☐ Use the CSS border shorthand property.
- ☐ Create rounded borders using border-radius.
- ☐ Design a simple webpage using CSS border properties.

II. REFERENCE MATERIALS

CSS Borders – https://www.w3schools.com/css/css_border.aspCSS Border Width – https://www.w3schools.com/css/css_border_width.aspCSS Border Color – https://www.w3schools.com/css/css_border_color.aspCSS Border Sides – https://www.w3schools.com/css/css_border_sides.aspCSS Border Shorthand – https://www.w3schools.com/css/css_border_shorthand.aspCSS Rounded Borders – https://www.w3schools.com/css/css_border_rounded.asp

III. CSS BORDER CONCEPTS

Property	Purpose
border-style	Defines the appearance/style of the border.
border-width	Defines the thickness of the border.
border-color	Defines the border color.
border-top / right / bottom / left	Controls an individual border side.
border	Shorthand for width, style, and color.
border-radius	Creates rounded corners.

IV. PART A – CREATE YOUR PROJECT

Create a folder named CSS_Border_Activity. Open it in Visual Studio Code and create index.html.

```

<!DOCTYPE html>
<html>
<head>
  <title>CSS Border Activity</title>
</head>
<body>
  <h1>CSS Border Activity</h1>
  <p>Learning CSS borders using Visual Studio Code.</p>
</body>
</html>

```

Checkpoint: ☐ HTML created ☐ Browser opens ☐ Heading displayed ☐ Paragraph displayed

V. PART B – BORDER STYLE

Experiment with solid, dotted, dashed, double, groove, ridge, inset, outset, and none.

```
p {
  border-style: solid;
}
```

Observations: solid solid line dotted dots dashed dashes double had two borders

What differences did you observe? each one had different styles of displaying the border.

VI. PART C – BORDER WIDTH

```
p {
  border-style: solid;
  border-width: 5px;
}
```

Experiment with 1px, 3px, 5px, and 10px.

```
.thin { border: 1px solid; }
.medium { border: 5px solid; }
.thick { border: 10px solid; }
```

What happens when border-width increases? the border got thicker

VII. PART D – BORDER COLOR

```
p {
  border-style: solid;
  border-width: 5px;
  border-color: red;
}
```

Experiment with red, blue, green, purple, and #800000.

```
.red-border { border: 4px solid red; }
.blue-border { border: 4px solid blue; }
.green-border { border: 4px solid green; }
```

Difference between border-color: red; and border: 4px solid red;? no difference

VIII. PART E – BORDER SIDES

```
h1 {
  border-top: 5px solid red;
  border-right: 5px solid blue;
  border-bottom: 5px solid green;
  border-left: 5px solid purple;
}
```

Draw your observation:

```
.box {
  border-top: 5px solid red;
  border-right: 5px dashed blue;
  border-bottom: 8px double green;
}
```

```
border-left: 3px dotted purple;
}
```

IX. PART F – BORDER SHORTHAND

General syntax:

```
border: width style color;
```

3px dashed blue → border: 3px dashed blue;

5px double green → border: 5px double green;

2px dotted purple → border: 2px dotted purple;

X. PART G – DIFFERENT WIDTHS FOR EACH SIDE

```
.box {
  border-style: solid;
  border-width: 2px 4px 8px 10px;
}
```

Top = 2px, Right = 4px, Bottom = 8px, Left = 10px.

Your code: border-width: 2px 4px 8px 10px;

XI. PART H – ROUNDED BORDERS

```
.box {
  border: 3px solid #800000;
  border-radius: 10px;
}
```

Experiment with 10px, 25px, and 50px.

How does increasing border-radius affect the corners?

increased value = the smoother the edges

XII. PART I – ROUNDED PROFILE CARD

```
<div class="profile">
  <h2>My TechPro Profile</h2>
  <p>Name: Jeric Y Ramo.</p>
  <p>Grade: 11 TechPro</p>
  <p>Dream Career: IT Specialist</p>
</div>

.profile {
  border: 4px solid #800000;
  border-radius: 20px;
  padding: 20px;
}
```

XIII. PART J – CREATE A CIRCLE

```
.circle {
  width: 150px;
  height: 150px;
  border: 5px solid #800000;
  border-radius: 50%;
}
```

Challenge: Change the circle's border color and thickness.

My design: border: 5 px solid red;

XIV. PART K – BORDER DESIGN CHALLENGE

- ☐ Each card has a different border style
- ☐ Each card has a different border color
- ☐ Each card has a different border width
- ☐ Each card has padding
- ☐ Each card has rounded corners
- ☐ Each card contains appropriate text

XV. MINI PROJECT – MY TECHPRO PROFILE CARD

Create a professional profile card containing your name, grade/section, favorite technology, favorite programming language, skills, and dream career.

Required: ☐ border-style ☐ border-width ☐ border-color ☐ border-top ☐ border-right ☐ border-bottom ☐ border-left ☐ border shorthand ☐ border-radius

XVI. CRITICAL THINKING QUESTIONS

1. Why is border-style important when creating a webpage?

2. What happens when you increase border-width?
allows you to modify its width

3. Why might a designer use different colors for different borders?
to make them look different from each other, if that's their focus

4. What is the advantage of styling individual border sides?
allows you to make unique combinations

5. What is the advantage of using the border shorthand?
makes it easier and faster to apply multiple border attributes

6. How does border-radius affect the appearance of a webpage?
it smoothens the edges of the borders

7. When might a rounded border be more appropriate than a square border?
on UI's or when you're trying to make your border design look modern / cleaner

XVII. DEBUGGING CHALLENGE

```
.profile {
  border 5px solid red;
  border-radius 20px;
  border-color blue;
}
```

Correct code:

border: 5px solid red; border-radius: 20px; (no need for another border color)

XVIII. CODE COMPLETION CHALLENGE

```
.card {
  border: __5__px __solid__ __maroon__;
  border-radius: __20__px;
```

```
padding: 15px;
}
```

Required: 5px solid maroon border, 20px radius, and 15px padding.

XIX. REFLECTION

Today I learned that CSS borders...
can really help you improve the visuals of borders, and allows you to freely edit as you want

The border property I found easiest to use was...
all of them, borders were pretty self explanatory so i quickly caught up

The border property I found most challenging was...
the combining multiple px values to target different sides with just one line, took me a while to get used

I can use CSS borders in a real webpage to...
significantly improve the look and feel of the webpage

XX. SUBMISSION REQUIREMENTS

CSS_Border_Activity project folder containing index.html should place inside your folder.

XXI. RUBRIC – 50 POINTS

Criteria	Points
Correct HTML structure	5
Border style	5
Border width	5
Border color	5
Individual border sides	5
Border shorthand	5
Rounded borders	5
Mini project requirements	5
Creativity and design	5
Proper submission and file organization	5
TOTAL	50

Teacher's Check: ☐ Activity completed ☐ Required CSS properties demonstrated ☐ Mini project completed ☐ Screenshots submitted
