

ACTIVITY SHEET

CSS MARGINS AND MARGIN COLLAPSE

Grade 11 – TechPro | Visual Studio Code

Name	Ramo, Jeric Y.
Grade & Section	11 - Bell
Date	9 / 29 / 2026
Score	_____ / 50

I. Learning Objectives

- Explain what CSS margin means.
- Apply margin to an HTML element.
- Use margin-top, margin-right, margin-bottom, and margin-left.
- Use the margin shorthand property.
- Explain simple margin collapse.
- Create a simple webpage using CSS margins.

II. Reference Materials

W3Schools: CSS Margin and CSS Margin Collapse.

III. Part A – Create Your Project

1. Create a folder named CSS_Margin_Activity.
2. Open it in Visual Studio Code.
3. Create index.html.
4. Save using CTRL + S.

IV. Part B – Create Your First Webpage

Type this in index.html:

```
<!DOCTYPE html>
<html>
<head>
  <title>CSS Margin Activity</title>
  <style>
    p {
      border: 2px solid maroon;
      margin: 30px;
      padding: 10px;
```

```
    }  
  </style>  
</head>  
<body>  
  <h1>CSS Margin Activity</h1>  
  <p>This paragraph has a margin.</p>  
</body>  
</html>
```

Press CTRL + S. Open index.html in a browser. Checkpoint: the paragraph has a border and space outside it.

V. Part C – Change the Margin

Find:

margin: 30px;

Change to:

margin: 50px;

Save and check. Question: What happened?

Answer: the space between <h1> and <p> got wider / bigger

VI. Part D – Margin on Each Side

Replace the margin code with:

```
p {  
  border: 2px solid maroon;  
  margin-top: 20px;  
  margin-right: 40px;  
  margin-bottom: 60px;  
  margin-left: 80px;  
  padding: 10px;  
}
```

Checkpoint: I used all four margin properties. ☐

VII. Part E – Margin Shorthand

Use:

margin: 20px 40px 60px 80px;

Order: Top → Right → Bottom → Left.

Question 1: How many values? Answer: 4

Question 2: Which value controls the top margin? Answer: first value

VIII. Part F – Easy Margin Practice

Practice 1

margin: 20px;

All four sides are 20px.

Practice 2

margin: 20px 40px;

Top/bottom 20px; left/right 40px.

Practice 3

margin: 20px 40px 60px;

Top 20px; left/right 40px; bottom 60px.

Practice 4

margin: 10px 20px 30px 40px;

Top 10px; right 20px; bottom 30px; left 40px.

IX. Part G – Margin Collapse

Margin collapse can happen when top and bottom margins of block elements meet. For these vertical margins, the larger margin can determine the resulting space.

```
p.first {  
    margin-bottom: 40px;  
}  
p.second {  
    margin-top: 20px;  
}
```

Question 1: Which margin is larger? Answer: p.first

Question 2: Do they simply become 60px? Answer: no. it will follow p.first since its margin value is bigger. (40px)

X. Part H – Simple Experiment

```
p.first {  
    margin-bottom: 80px;  
}  
p.second {  
    margin-top: 20px;  
}
```

Save and check. What is the important idea about vertical margin collapse?

Answer: when two vertical margins touch, they combine into a single margin whose size is the largest. not combine.

XI. Part I – Final Mini Project: My TechPro Profile

```
<!DOCTYPE html>
<html>
<head>
  <title>My TechPro Card</title>
  <style>
    .card {
      border: 3px solid maroon;
      margin: 30px;
      padding: 20px;
    }
    .card h2 {
      margin-bottom: 20px;
    }
    .card p {
      margin-top: 10px;
    }
  </style>
</head>
<body>
  <div class="card">
    <h2>My TechPro Profile</h2>
    <p>Name: Your Name</p>
    <p>Grade: Grade 11</p>
    <p>Course: TechPro</p>
    <p>Favorite Technology: _____</p>
  </div>
</body>
</html>
```

Replace Your Name and Favorite Technology. Save and test.

XII. Check Your Work

- ☐ Created CSS_Margin_Activity folder.
- ☐ Created index.html.
- ☐ Used margin.
- ☐ Used margin-top/right/bottom/left.
- ☐ Used margin shorthand.
- ☐ Tested different margin values.
- ☐ Learned margin collapse.
- ☐ Completed the TechPro mini project.

XIII. Review Questions
