

GRADE 11 TECHPRO ACTIVITY SHEET

CSS TEXT FORMATTING

NAME:	Ramo, Jeric Y.	DATE:	10 / 8 / 2026
SECTION:	11 - Bell		

Learning Objectives

- Use CSS text properties to control appearance and alignment.
- Apply text-align and text-align-last.
- Apply text-decoration and text-decoration-style.
- Use text-transform to change letter case.
- Control spacing with text-indent, letter-spacing, line-height, word-spacing, and white-space.
- Create text shadows with text-shadow.
- Combine the properties in a readable TechPro webpage.

Instructions

- Create CSS_Text_Activity.
- Open it in Visual Studio Code.
- Create index.html.
- Enter each code example, save, and view it in a browser.
- Change values as instructed and observe the result.
- Complete the mini-project and review questions.

PART A — Create the Starter Page

Create index.html and enter:

```
<!DOCTYPE html>
<html>
<head>
  <title>CSS Text Activity</title>
  <style>
    body { font-family: Arial, sans-serif; }
  </style>
</head>
<body>
  <h1>My CSS Text Activity</h1>
  <p>CSS can change how text looks and how it is arranged.</p>
</body>
</html>
```

PART B — CSS Text Basics

Practice text color and basic text formatting.

```
body { color: #222222; }
h1 { color: maroon; }
```

PART C — Text Alignment

Practice left, right, center, and justify.

```
.left { text-align: left; }
.right { text-align: right; }
.center { text-align: center; }
.justify { text-align: justify; }

<p class="left">Left aligned</p>
<p class="right">Right aligned</p>
<p class="center">Centered</p>
<p class="justify">This is a longer paragraph. Add enough words to observe justified text.</p>
```

Extension: Try text-align-last: center; on a multi-line paragraph.

PART D — Text Decoration

Practice underline, overline, line-through, and none.

```
.underline { text-decoration-line: underline; }
.overline { text-decoration-line: overline; }
.strike { text-decoration-line: line-through; }
.none { text-decoration-line: none; }
```

Reminder: avoid underlining ordinary text when it may be confused with a link.

PART E — Text Decoration Styles

Test solid, double, dotted, dashed, and wavy.

```
p.solid { text-decoration-line: underline; text-decoration-style: solid; }
p.double { text-decoration-line: underline; text-decoration-style: double; }
p.dotted { text-decoration-line: underline; text-decoration-style: dotted; }
p.dashed { text-decoration-line: underline; text-decoration-style: dashed; }
p.wavy { text-decoration-line: underline; text-decoration-style: wavy; }
```

Try the shorthand:

```
text-decoration: underline maroon wavy 3px;
```

PART F — Text Transformation

Use text-transform to change letter case.

```
.upper { text-transform: uppercase; }
.lower { text-transform: lowercase; }
.capitalize { text-transform: capitalize; }
.normal { text-transform: none; }
```

PART G — Text Spacing

Practice text-indent, letter-spacing, line-height, word-spacing, and white-space.

```
.indent { text-indent: 40px; }
.letters { letter-spacing: 3px; }
.lines { line-height: 1.8; }
.words { word-spacing: 10px; }
.no-wrap { white-space: nowrap; }
```

Observe the first-line indent, character spacing, line spacing, word spacing, and wrapping behavior.

PART H — Text Shadow

Add a shadow to a heading, then experiment with the values.

```
h1 {
  text-shadow: 2px 2px 4px gray;
}
text-shadow: 3px 3px 5px maroon;
```

Challenge: try two shadows separated by a comma.

PART I — Mini Project: My TechPro Text Profile

Create a one-page TechPro profile containing:

- My TechPro Profile heading
- Your name, grade, and section
- A short paragraph about ICT
- A centered main heading
- At least one text decoration
- At least one text transformation
- At least one text-spacing property
- A text shadow
- Good text/background contrast

Suggested CSS:

```
.title {
  text-align: center;
  text-transform: uppercase;
  text-shadow: 2px 2px 4px gray;
}
.subtitle {
  text-decoration: underline;
  text-decoration-style: wavy;
}
```

```
.description {
  text-indent: 30px;
  line-height: 1.6;
  letter-spacing: 0.5px;
}
```

PART J — Challenge Task

Create a second section titled “My Future in Technology.” Use at least five different CSS text properties. Choose your own values and keep the page readable and professional.

Check Your Work

- ☐ Created CSS_Text_Activity and index.html.
- ☐ Practiced text alignment.
- ☐ Practiced text decoration and styles.
- ☐ Practiced text transformation.
- ☐ Practiced text spacing.
- ☐ Practiced text shadow.
- ☐ Completed the TechPro Text Profile.
- ☐ Saved and tested the final work.

Review Questions

1. What does text-align do?

Answer: it sets the horizontal alignment of text and inline content inside its box / element

2. What is the difference between underline, overline, and line-through?

Answer: the main difference between them is the position of the horizontal line relative to the main text

3. What does text-decoration-style control?

Answer: it controls the appearance or pattern of decorative lines applied to the main text

4. What does text-transform: uppercase do?

Answer: turns all the letters of a text into its CAPITAL version, even if you type its lower-case version

5. What is the purpose of text-indent?

Answer: its purpose is to add empty space before the first line of text inside its box / element

6. What is the difference between letter-spacing and word-spacing?

Answer: letter-spacing controls the space between letters, word-spacing controls the space between words

7. What does line-height control?

Answer: controls the spacing between lines of texts

8. What does white-space: nowrap do?

Answer: prevents text from wrapping onto the next line, forcing all content to stay on a single continuous line

9. What are the basic parts of a text-shadow value?

Answer: two required position offsets, an optional blur radius, and an optional color

Quick Review

text-align = horizontal text alignment.

text-decoration = decorative lines.

text-decoration-style = solid, double, dotted, dashed, or wavy.

text-transform = changes letter case.

Text spacing properties control indentation, character spacing, line spacing, word spacing, and white-space handling.

text-shadow = adds a shadow effect.
